Innovative Robotic Bag Placer

For Immediate Release

Taylor Products, Division of Magnum Systems, announces the release of the TRV1000 Robotic Valve Bag Placer. The TRV1000 is the latest in innovation from Taylor Products. This placer offers the latest in robotic technology through Taylor Product's unique relationship with FANUC Robotics. FANUC is the world's largest robotics producer, and has built a reputation for cutting edge technology. The placer is capable of placing bags on multiple machines, being mounted in multiple positions, and customizable to your specific application.

- Direct labor savings and improved personnel scheduling and utilization
- Multiple mounting positions, compact size and small footprint facilitate placement in tight surroundings
- Dust and water resistant design maximize durability
- Flexibility to handle multiple sized products with one robot
- Requires minimal programming and maintenance

Their approach is to combine standard products with custom engineered system components to produce complete, productive and efficient system. A system you can count on for uptime, accuracy and fast payback.

Taylor Products, a division of Magnum Systems, is a leader in material handling, weighing, and packaging equipment. For over 50 years Taylor Products has provided customers with versatile, cost effective, packaging equipment, and continues this trend today.
